PROJECTS

CarDekho Group(Mar 2022-Apr 2024)

8 Months

1.LMS

About Projects: It's app for both the platform(Android & iOS) to create leads and manage leads of new car purchase in South East Asia.

Tools & Technologies: It was developed by using React Native, JavaScript, React, React hooks, Higher Order Component, Context Api, Render Props, Realm, Firebase, Rest Api, Third parties Api, Unit Testing(Jest) and Jira.

Roles & Responsibilities:

i. Write clean, efficient, and maintainable code using JavaScript and the React Native framework.

ii. Build cross-platform applications for iOS and Android from a single codebase.

iii. Implement RESTful APIs to connect the application with backend services.

iv. Handle third-party API integrations such as payment gateways, social media, and analytics services

v. Optimize application performance to ensure smooth user experiences.

2. Vouch

7 Months

About Project: It's app for both the platform(Android & iOS) to create and share feed like Instagram.

Tools & Technologies: It was developed by using Tools & Technologies React Native, JavaScript, React, React hooks, Redux, Redux Thunk, Firebase, Rest Api, Third parties Api and Jira.

Roles & Responsibilities:

- i. Write clean, efficient, and maintainable code using JavaScript and the React Native framework.
- ii. Build cross-platform applications for iOS and Android from a single codebase.
- iii. Implement RESTful APIs to connect the application with backend services.
- iv. Handle third-party API integrations such as payment gateways, social media, and analytics services
- v. Optimize application performance to ensure smooth user experiences.

Affle Inida Ltd(Apr 2019-Oct 2020)

8 Months

1. Niine

About Project: It's a Mobile application for both the platform(Android & iOS), in this girls or women can track their next period date by

logging their previous date and can also find their ovulation period.

Tools & Technologies: It was developed by using Tools & Technologies React Native, JavaScript, React, Higher Order Component, Firebase, Rest Api, Third parties Api and Jira.

Roles & Responsibilities:

i. Write clean, efficient, and maintainable code using JavaScript and the React Native framework.

ii. Build cross-platform applications for iOS and Android from a single codebase.

iii. Implement RESTful APIs to connect the application with backend services.

iv. Handle third-party API integrations such as payment gateways, social media, and analytics services

v. Optimize application performance to ensure smooth user experiences.

App Links:

https://play.google.com/store/apps/details?id=com.girnarsoft.zwph&pcampaignid=web_share

2. Sunny E-Store

6 Months

About Project: It's a E-Commerce Mobile Application for both the platform (Android & iOS), sells electronic gadgets.

Tools & Technologies: It was developed by using Tools & Technologies React Native, JavaScript, React, Higher Order Component, Firebase, Rest Api, Third parties Api and Jira.

Roles & Responsibilities:

i. Write clean, efficient, and maintainable code using JavaScript and the React Native framework.

ii. Build cross-platform applications for iOS and Android from a single codebase.

iii. Implement RESTful APIs to connect the application with backend services.

iv. Handle third-party API integrations such as payment gateways, social media, and analytics services

v. Optimize application performance to ensure smooth user experiences.

3. Funda E-Learning

6 Months

About Project: It's an mediators app for both the platform (Android & iOS) between tutor and

student, in this app student can book their sessions for resolving doubts and tutor can place bid to their respective sessions.

Tools & Technologies: It was developed by using Tools & Technologies React Native, JavaScript, React, Higher Order Component, Firebase, Rest Api, Third parties Api and Jira.

Roles & Responsibilities:

i. Write clean, efficient, and maintainable code using JavaScript and the React Native framework.

ii. Build cross-platform applications for iOS and Android from a single codebase. Implement.

iii. RESTful APIs to connect the application with backend services.

iv. Handle third-party API integrations such as payment gateways, social media, and analytics services.

v. Optimize application performance to ensure smooth user experiences.
