Profile Summary

With over 5 years of experience in software development, I have expertise in React-Native, React, Redux, and Firebase. I have worked on notable projects like OTO SFA, OTO Dealer, Wealth Concert, Vouch, Funda E-Learning, Sunny E-Store, and Niine. Skilled in UI/UX, API integration, push notifications, and bug resolution. Excited about leveraging my skills for organizational growth.

Technical Skills

- ❖ React Native, Javascript, Typescript, ES6, React Hook, Redux, Redux Middleware, Redux Toolkit, Context API, Higher, Order Component(Custom HOC), Render Props, SQL, SQLite, Realm, Rest Api, GraphQL, JSON, Firebase, Social Authentication(Google, Facebook, Apple), Push Notification, Deep Linking, CI/CD Pipeline(App Center & CodePush), Debugging Tool(React Developer Tool), Performance Testing and Debugging Tool(Flipper), Unit Testing(Jest), JIRA Tool, GIT, Sourcetree.

Work Experience

Software Development Engineer II
CarDekho Group

[Mar 2022-Apr 2024]
Gurgaon, Haryana

- ❖ Worked on more than 3 hybrid applications ensuring all the business and design objectives are met.
- ❖ Use of React Flexbox in application development to ensure that UI is perfect on different screen sizes.
- ❖ Managed the complete development process of the apps & provided valuable solutions to many project issues.
- ❖ Received appreciation from project managers & clients for completing various project milestones.

Notable Projects

- ❖ **OTO SFA:** : It's an app for both the platform(Android & iOS) for managing loan leads and insurance of used cars in South East Asia.
- ❖ **Tools & Technologies:** It was developed by using React Native, JavaScript, React, React hooks, Higher Order Component, Context Api, Render Props, Realm, Firebase, Rest Api, Third parties Api, Unit Testing(Jest) and Jira.
- ❖ **Roles & Responsibilities:**
 - Work on the UI/UX, integrating restful API's, modification of UI, implementing various business logic & bug resolution.
 - Write clean, efficient, and maintainable code using JavaScript, React and the React Native framework.
 - Build cross-platform applications for iOS and Android from a single codebase.

- Implement RESTful APIs to connect the application with backend services.
- Handle third-party API integrations such as payment gateways, social media, and analytics services.
- Optimize application performance to ensure smooth user experiences.
- Verify test cases given by the testing team before moving the build to the testing team.
- Use version control systems like Git to manage and track code changes.
- Gather feedback and incorporate product requirements into the application development process.
- Learn and implement new tools, libraries, and frameworks as necessary.
- Continuously enhance personal skills and knowledge related to React Native, JavaScript, and mobile application development.

❖ **App Links:**

- Android: https://play.google.com/store/apps/details?id=com.int.sfa&pcampaignid=web_share
- iOS: <https://apps.apple.com/in/app/otosfa/id1489698573>

❖ **OTO Dealer:** It's an app for both the platform(Android & iOS) for managing dealers in South East Asia.

❖ **Tools & Technologies:** It was developed by using React Native, JavaScript, React, React hooks, Higher Order Component, Context Api, Render Props, Realm, Firebase, Rest Api, Third parties Api, Unit Testing(Jest) and Jira.

❖ **Roles & Responsibilities:**

- Work on the UI/UX, integrating restful API's, modification of UI, implementing various business logic & bug resolution.
- Write clean, efficient, and maintainable code using JavaScript, React and the React Native framework.
- Build cross-platform applications for iOS and Android from a single codebase.
- Implement RESTful APIs to connect the application with backend services.
- Handle third-party API integrations such as payment gateways, social media, and analytics services.
- Optimize application performance to ensure smooth user experiences.
- Verify test cases given by the testing team before moving the build to the testing team.
- Use version control systems like Git to manage and track code changes.
- Gather feedback and incorporate product requirements into the application development process.
- Learn and implement new tools, libraries, and frameworks as necessary.
- Continuously enhance personal skills and knowledge related to React Native, JavaScript, and mobile application development.
